### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 1, line 18, --a—has been inserted after “removing”, before “portion”.

### *Reasons For Allowance*

2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach, either alone or in combination, the steps of the claimed invention, as amended by the amendment filed on 3/21/05.
3. The closest prior art of record, Tsai et al., US 2005/0054194, found upon an updated search, fails to teach or to suggest, the step of “said trench-defining shape exposing a second portion of said stack of insulator layers”. Instead, a thin layer of resist remains over the second portion of the stack of insulator layers, so that the trench-defining layer does not expose it (figure 1D, [0022]). Tsai does teach an antireflection layer 16, which may be one BARC or two layers in succession of BARC/etch stop [0020]. The etch stop layer materials disclosed include capping layer materials, including silicon nitride.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
